Disklabs specialise in data recovery for businesses that have suffered data loss. Disklabs understand that the most critical asset your company has is its data. Disklabs will turn your disaster into a manageable problem, assisting you in returning your business to optimum efficiency in the shortest possible time. Disklabs apply the best hardware and software techniques with an accredited service to satisfy their customers' needs.

Disklabs perform certified data erasure on enterprise storage platforms that include EMC, Hitachi, HP, IBM, NetApp and others within data centres.

Disklabs provide companies and agencies with reassurance that any sensitive data can be erased securely at the clients site. Disklabs will protect your Brand, your clients and your data by securely erasing all data to a certified level complying with Government and EU standards.

Disklabs undertake digital forensic investigations for the Public and Private sectors. Our experts work for both defence and prosecution including 37 of the UK's Police Forces. Disklabs digital forensic services include - Computer Analysis, Mobile Phone Analysis, Cell Site Analysis and Sat Nav Analysis
